

These buttons allow you to go forward and backwards

The page icons allow you to zoom in and out of the document. You can also adjust the document viewing size by using the zoom icon or the magnifying glass icon.

It is recommended to print only selected pages. Click on the print icon in the menu bar on top of your screen and type in the appropriate print range. (If you wish to print the whole document, select 'ALL'; however, depending on the memory capacity of your printer, this may not work. In that case, print the publication in three or four 'lots'.)

If you have difficulties setting the appropriate print ranges, click 'print range' to access a reference page.

There are two ways of navigating through the publication: Click on the bookmarks in the left-hand panel or alternatively click on the items in the contents list (hyperlinks).

On each page you find a 'back to contents' button which takes you back to the contents list.

All email and website addresses highlighted blue are 'hotlinked' to the internet, i.e. if your browser is active clicking on the link will either open up the respective website or an email dialogue box with the address already typed in.
